IS YOUR ONLINE PRESENCE DAMAGING YOUR BUSINESS?

Everyday your business website and social media lays quiet, custom is lost. Your customers are turned off by out-of-date content and poor formatting. On average your website has 6 seconds to sell. You snooze, you lose!

Changes to Google's search formula mean inactive websites will become virtually invisible to the public.

How often do you work on your own website?

Are competitors benefiting from your inactivity?

Are customers filling up shop carts only to disappear before purchasing?

Do you have social media pages with little or no content?

Do your web visitors arrive and leave in seconds?

YOUR CONTENT IS A VALUABLE COMMODITY

Don't let this be your story. Your online activity is proving more effective than traditional advertising. TORUS DIGITAL MARKETING creates quality content for all your online requirements. We manage Websites, Social Media, Blogs, PR, Advertising and SEO. We promise you more visibility, more visitors and more sales.
